

## **List of Posters**

## Synthesis

<b>Synthesis and mechanistic studies of hetero arylidene-9(10H)-anthrone</b>	Daniela Peixoto	<b>P1</b>
<b>Exploring the chemistry of diketopyrrolopyrroles: Synthesis of sulfonamide derivatives</b>	Vítor A. S. Almodôvar	<b>P2</b>
<b>Synthesis of novel thiochromene quinazolines by copper-catalyzed tandem Ullmann type C – N coupling and dehydrative cyclization</b>	Fernando Durães	<b>P3</b>
<b>Carboxyxanthone derivatives: synthesis and effect on human tumor cell lines</b>	Carla Fernandes	<b>P4</b>
<b>Selenolates-promoted Regioselective Ring-Opening of 2,3-epoxy ester: Experimental and Theoretical Studies of MeSe<sup>-</sup> Nucleophilic Behaviour</b>	Gizele Celante	<b>P5</b>
<b>Novel Chiral Hexacyclic Steroids by Exploring the Reactivity of Steroidal Azadienes towards Enamines</b>	Susana M. M. Lopes	<b>P6</b>
<b>Natural Deep Eutectic Solvents in the Synthesis of Bis(indoly)methanes</b>	Carla Grosso	<b>P7</b>
<b>New Ionic Liquids and their covalent analogues based on antimalarial drugs and fatty acids</b>	Ana Teresa Silva	<b>P8</b>
<b>Semisynthesis of Aminocarbazole Alkaloid Derivatives</b>	Suchanya Peerasiri	<b>P9</b>
<b>Synthesis of Triazole Linked Flavonoid Glycosides by Click Chemistry</b>	Daniela Pereira	<b>P10</b>
<b>New double functionalizable <i>trans</i>-cyclooctenes for enhanced spatial and temporal resolution and drug delivery</b>	João M. J. M. Ravasco	<b>P11</b>
<b>Novel PEGylated 4,5,6,7-Tetrahydropyrazolo[1,5-<i>a</i>]pyridine-fused Chlorins</b>	João C. S. Simões	<b>P12</b>
<b>Synthesis of pyridinium and methoxypyridinium chlorins and their comparative structural characterization and photophysical properties</b>	Leandro M. O. Lourenço	<b>P13</b>

<b>Synthesis and photophysical properties of porphyrin-azadipyrromethene conjugates</b>	Leticia D. Costa	<b>P14</b>
<b>Mono-charged porphyrin-imidazole derivatives in the inactivation of <i>Escherichia coli</i></b>	Nuno M. M. Moura	<b>P15</b>
<b>New proline-guanidine based compounds – a challenging natural scaffold</b>	Mónica Lopes	<b>P16</b>
<b>Synthesis of potentially bioactive Pseudo-C-Nucleosides for the treatment of Bipolar Disorder</b>	Maria I. Ismael	<b>P17</b>
<b>Synthesis of chiral spiro-<math>\gamma</math>-lactams derived from <i>L</i>-cysteine</b>	Margarida I. Esteves	<b>P18</b>
<b>Synthesis of New Immobilised Galactosyltransferase Inhibitors</b>	Márcia Rénio	<b>P19</b>
<b>Synthesis of new chiral derivatives of xanthenes coupled with proteinogenic amino acids</b>	Maria Elizabeth Tiritan	<b>P20</b>
<b>Phenol iminoboronates conjugates: Improved iminoboronate's stability to targeted delivery for cancer</b>	Ricardo M. R. M. Lopes	<b>P21</b>
<b>Antibacterial activity of quinazolinone alkaloids with pyrazino[1,2-<i>b</i>]quinazoline-3,6-dione containing indole</b>	Solida Long	<b>P22</b>
<b>Microwave-assisted synthesis of Tryptanthrin from Indigo: an alternative route for an important scaffold in Medicinal Chemistry</b>	Pedro Brandão	<b>P23</b>
<b>Synthesis of Cyclopenta[<i>c</i>]chromenes via Phosphane-catalyzed [3+2] Annulation of Allenates with 3-Nitrochromenes</b>	Maria I. L. Soares	<b>P24</b>
<b>Novel Symmetrical Pyrano-Styryl-Flavylium Dye</b>	Vânia Gomes	<b>P25</b>
<b>Stability of the Modular BASHY Platform in Aqueous Media</b>	Cátia Parente Carvalho	<b>P26</b>

<b>Synthesis of new photo-active compounds for environmentally friendly organic photovoltaics</b>	Cristiana Costa	<b>P27</b>
<b>Pyridin-2-ylthiazolothiazoles: synthesis and functionalization</b>	Ana F. R. Cerqueira	<b>P28</b>
Catalysis		
<b>Synthesis of novel 8-(het)aryl-6H-pyrano[4',3':4,5]thieno [3,2-b]pyridines</b>	Juliana M. Rodrigues	<b>P29</b>
<b>(R)-10-Camphorsulfonic acid based ligands for enantioselective alkylation of aldehydes</b>	Francisco J. P. M. Sousa	<b>P30</b>
<b>Asymmetric Synthesis of 2-(Tetrazol-5-yl)-2H-Azirines</b>	Cláudia C. Alves	<b>P31</b>
<b>Tetrazole-Saccharins: Ligands, Catalysts and Mutual Function</b>	Luís M. T. Frija	<b>P32</b>
<b>Catalytic Hydrosilylation Reactions with immobilized cinchona catalysts</b>	Marina M. Costa	<b>P33</b>
<b>POP-UP: Peptides in OPorto – University of Porto peptide synthesis facility</b>	Paula Gomes	<b>P34</b>
Natural Product Chemistry		
<b>Progress towards the total synthesis of a natural pyrazino[2,1-b]quinazoline-3,6-dione containing indol</b>	Emília Sousa	<b>P35</b>
<b>Oleuropein as a valuable scaffold for synthetic transformations</b>	Lídia A. S. Cavaca	<b>P36</b>
<b>Nuclear Magnetic Resonance Analysis of Portuguese, French and Tunisian olive oils: Discrimination by geographic origin</b>	Arona Pires	<b>P37</b>
<b>Terpenoids from <i>S. agaricina</i></b>	Patrícia Máximo	<b>P38</b>

<b>Phytochemical characterization and determination of the biological activity of the hydroethanolic extract of barks of <i>Salix salviifolia</i></b>	José A. Figueiredo	<b>P39</b>
<b>Valorisation of <i>Scabiosa stellata</i> L.: A wild and underexploited species from Batna (Algeria)</b>	Diana C. G. A. Pinto	<b>P40</b>
<b>Ethnomedicinal Value of Plants in a Small Community in São Miguel Island, Azores</b>	Ana M. L. Seca	<b>P41</b>
<b>Synthesis and <i>in silico</i> biophysicochemical properties of marine xanthenes and derivatives</b>	Álvaro F. Magalhães	<b>P42</b>
Green Chemistry		
<b>Synthesis of porphyrins under mechanical activation</b>	Carla Gomes	<b>P43</b>
<b>Green synthetic approach to the synthesis of linked oleanolic acid derivatives</b>	Anna Pawełczyk	<b>P44</b>
<b>Nucleofilic Addition of indole to steroidal enones as a synthetic route to potential new antiproliferative agents</b>	Samuel Silvestre	<b>P45</b>
<b>Curcubiturilglicols: Novel smart nanovesicles</b>	Vasco D. B. Bonifácio	<b>P46</b>
<b>Synthesis of fluorescent water-soluble oligo(oxazoline-ethylenimine) block copolymers</b>	Rita F. Pires	<b>P47</b>
<b>Greener Approach for the Synthesis of Oligopeptides in Solution-Phase</b>	Ivo E. Sampaio-Dias	<b>P48</b>
Materials Chemistry		
<b>Optimization of the photochromic performance of hybrid materials doped with vinylidene-naphthofurans</b>	Paulo Coelho	<b>P49</b>
<b>BODIPY small molecules as highly suitable donor materials for organic photovoltaic cells: Synthesis, Characterization and OPV cells application</b>	António Aguiar	<b>P50</b>

<b>Highly Selective and Sensitive Detection of Toxic Metals by Fluorescent Bicyclic Calix[4]arene-based Sensors</b>	Alexandra I. Costa	<b>P51</b>
<b>Development of drug delivery systems based on high wavelength light – sensitive polymers</b>	Camila G. Dariva	<b>P52</b>
<b>Graphene oxide-based nanomaterial: preparation, characterization and application in water purification</b>	Thais Cheminski	<b>P53</b>
Physical Organic Chemistry		
<b>Atropisomerism in Diphenylguanidinium salts</b>	Marta S. C. Henriques	<b>P54</b>
<b>Synthesis and Anion Binding Properties of Fluorescent Dihomooxacalix[4]arene Dinaphthylthiourea Derivative</b>	Alexandre S. Miranda	<b>P55</b>
<b>Potential Beyond the Use of Conventional Photodynamic Therapy</b>	Ana I. Mata	<b>P56</b>
<b>Hexahomotrioxacalix[3]arene Trinaphthylthiourea:</b>		
<b>Synthesis and NMR Conformational Studies of a New Fluorescent Receptor</b>	Paula M. Marcos	<b>P57</b>
<b>Synthesis and photochemical characterization of coumarin-based chromophores</b>	Rafael Mamede	<b>P58</b>
Computational Methods and Drug Design		
<b>New Bace I Inhibitors: A Structure-Based and Ligand-Based Rational Drug Design. Pharmacophore Modeling and Virtual Screening</b>	Judite R. M. Coimbra	<b>P59</b>
<b>Targeting glucose metabolism for cancer treatment: a virtual screening search for hexokinase II inhibitors</b>	Sara N. Garcia	<b>P60</b>
<b>Synthesis, Characterization, and Biological Evaluation of Novel Thiazolo[3,2-<math>\alpha</math>]pyrimidines as Prospective Acetylcholinesterase Inhibitors</b>	Mohamed Y. Mahgoub	<b>P61</b>
<b>Probing NKp30 Ligand Space – a molecular dynamics approach</b>	Josimar P. Cruz	<b>P62</b>

<b>Small-molecule immune system modulators: An <i>in silico</i> strategy for cancer immunotherapy</b>	Rita C. Acúrcio	<b>P63</b>
<b>Exploring the conformational and structural profile of the human 20S proteasome: A Molecular Dynamics study</b>	Pedro M. P. Fernandes	<b>P64</b>
<b>Computational design of novel epigenetic inhibitors in cancer: 3D-pharmacophore optimization</b>	Filipa Ramilo Gomes	<b>P65</b>
<b>Withdrawn</b>		<b>P66</b>
<b>Withdrawn</b>		<b>P67</b>
<b>A new structure-based anti-viral resistance prediction algorithm: HIV-1 protease as a case study</b>	João P. Luís	<b>P68</b>
<b>New Structure-Function Insights on the G Family of ABC Transporters</b>	Daniel J. V. A. dos Santos	<b>P69</b>
<b>Metal and drug transport by human serum transferrin – a computational study</b>	Gonçalo C. Justino	<b>P70</b>
<b>Novel PARP-1 Inhibitor Scaffolds: A Dynamic-Based Pharmacophore Approach</b>	Salete J. Baptista	<b>P71</b>
<b>Discovery of LRRK2 inhibitors using an ensemble of virtual and yeast-based screening methods</b>	Sofia Domingos	<b>P72</b>
Pharmacokinetics and Drug Metabolism		
<b>Biomarkers of diseases more prevalent in women: synthesis and characterization of mercapturate conjugates of estrogen-derived quinoid metabolites</b>	Catarina Charneira	<b>P73</b>
<b>Withdrawn</b>		<b>P74</b>
<b>Partition of amphiphilic molecules to lipid bilayers by ITC. Low affinity solutes</b>	Jaime Samelo	<b>P75</b>

## Quantitative Structure-Activity Relationships

**Effect of acyl chain length on the rates of phospholipid intermembrane transfer and flip-flop**

Maria J. Moreno **P76**

## Toxicology in Drug Discovery

**Biomarkers of chemically-induced cancer: the acrylamide case study**

João Nunes **P77**

## Novel biologically active compounds

**Diazaborines: Boronic acids under disguise for selective inhibition of Human Neutrophil Elastase**

João P M. António **P78**

**Boron-promoted Modular Assembly of Multivalent and Reversible Tumor-Targeting Drug Conjugates**

Fábio M. F. Santos **P79**

**3HQs as responsive handles for boronic acid bioconjugation**

Roberto Russo **P80**

**A comparison of safety profiles for two groups of anticancer agents: selenoesters and hydantoins**

Małgorzata Anna Marć **P81**

**Novel Carbohydrate Based “Cancer Busting” Hybrids**

Elisabete P. Carreiro **P82**

**Withdrawn**

**P83**

**Exploiting tacrine-based hybrids as a multi-target strategy for potential anti-Alzheimer’s drugs**

Maria A. Santos **P84**

**Withdrawn**

**P85**

**Fighting Neglected Tropical Diseases: antitrypanosomal activity of Torin-based compounds**

Ana S. Ressurreição **P86**

<b>Cytotoxic Activity of N-Heterocyclic Carbenes Derived from Guanosine</b>	M. Inês P. S. Leitão	<b>P87</b>
<b>Preparation and biological evaluation of a cyclopentenone family as anticancer agents: Structure Activity Relationship and mechanism of action</b>	Késsia H. S. Andrade	<b>P88</b>
<b>Oxazol-5-(4H)-ones as novel modulators of necroptosis</b>	Maria Beatriz T. Ferreira	<b>P89</b>
<b>Synthesis and Preliminary Evaluation of new A-ring Modified Asiatic Acid Derivatives as Anticancer Agents</b>	Daniela F. F. Marques	<b>P90</b>
<b>Design and Synthesis of New Fluorinated Asiatic Acid Derivatives with improved antiproliferative activity in several tumor cell lines.</b>	Bruno M. F. Gonçalves	<b>P91</b>
<b>Design, synthesis and anticancer activity of novel A-ring cleaved ursolic acid derivatives in human non-small cell lung cancer cells</b>	Vanessa I.S. Mendes	<b>P92</b>
<b>Acylation of oleanolic acid oximes with benzoic and nitrobenzoic acids and anticancer activity of the obtained products</b>	Lucjusz Zaprutko	<b>P93</b>
<b>Synthesis of estrogen derivatives with potential neuroprotective activity</b>	Alcino J. Leitão	<b>P94</b>
<b>New Chromene-Based Drug Candidates for Cancer Treatment</b>	Olívia Pontes	<b>P95</b>
<b>Synthesis and Structure/Activity Relationships of 2'-Hydroxylated Chalcones</b>	Gonçalo P. Rosa	<b>P96</b>
<b>Synthesis of zosteric acid and gallic acid persulfate analogues</b>	Ana R. Neves	<b>P97</b>
<b>N-Terminal cysteine functionalization through iminoboronate and thiazolidine cyclization</b>	Maria J. S. A. Silva	<b>P98</b>
<b>New Chalcone Derivatives: Synthesis and Antitumor Activity Evaluation</b>	Honorina Cidade	<b>P99</b>

<b>Synthesis of new bioinspired antifouling agents</b>	Marta Correia-da-Silva	<b>P100</b>
<b>Exploring the Potential Synergic Effect of GPE Lipophilic Conjugates with Neuroprotective Amines</b>	Sara C. Silva-Reis	<b>P101</b>
<b>Characterization and application of fluorescent BASHY dyes as potential biosensors</b>	Joana Carvalho	<b>P102</b>
<b>Reversible targeting drug conjugates based on boron complexes</b>	Sílvia Baldo	<b>P103</b>
<b>Novel 4,9-diaminoacridine derivatives as potential multi-target antimalarials</b>	Natália Tassi	<b>P104</b>
<b>Synthesis and antimicrobial evaluation of new halogenated xanthenes</b>	Diana Resende	<b>P105</b>
<b>Allylic oxidation of pregnane steroids as a synthetic route to potential antiproliferative agents</b>	Octávio Ferreira	<b>P106</b>
<b>Synthesis and characterization of PS-polymer materials for antimicrobial approaches</b>	Mariana Q. Mesquita	<b>P107</b>
<b>Highly active 2-thioxothiazolidin-4-one derivatives for transthyretin protein stabilization and amyloid fibril inhibition</b>	Bruno F. O. Nascimento	<b>P108</b>
<b>Spiropyrazoline oxindoles as p53-MDM2/X inhibitors – synthesis and computational studies</b>	Elizabeth A. Lopes	<b>P109</b>
<b>The quinoline-quinolone tautomerism in cyclisation reactions of aryl-enamines. Relevance for quinolone-based antimalarials design</b>	Elisa M. Brás	<b>P110</b>
<b>Intraepidermal delivery of a new bacteriochlorin with low molecular weight</b>	Helder T. Soares	<b>P111</b>
<b>Novel platinum (II) 4,5,6,7-tetrahydropyrazolo[1,5-<math>\alpha</math>]pyridine-fused chlorins as promising theranostic agents for cancer treatment</b>	Márcia Campos	<b>P112</b>

<b>New porphyrin-uracil-alditol conjugates: synthesis characterization and biological assessment</b>	Maria A. F. Faustino	<b>P113</b>
<b>New Cationic Benzoporphyrins as Photosensitizers in PDT of Bladder Cancer Cells</b>	José A. S. Cavaleiro	<b>P114</b>
<b>New Triazole-Porphyrin Derivatives: Synthesis and Photodynamic Activity against Bladder Cancer Cells</b>	Ana T. P. C. Gomes	<b>P115</b>
<b>Discovery of Novel Metallo-Beta-Lactamase Inhibitors through Computer-Assisted Drug Design</b>	Maria M. C. Silva	<b>P116</b>
<b>Azaaurones as antitubercular agents: Improving the metabolic stability of N-protected derivatives</b>	André Campaniço	<b>P117</b>
<b>Probing the Torin2 Chemical Space against Liver and Blood Stages of Malaria Parasites</b>	Jorge Grilo	<b>P118</b>
<b>New marinoquinoline analogues with antitubercular activity</b>	Michele Panciera	<b>P119</b>
<b>A Novel Series of Tryptophanol-Derived Oxazoloisoindolinones with promising activities as dual inhibitors of p53-MDM2/X interactions</b>	Margarida Espadinha	<b>P120</b>
<b>Synthesis and evaluation of the potential use of an aminosquarylium cyanine dye as fluorescent probe for detection of BSA</b>	Joana F. Silva	<b>P121</b>
<b>Synthesis and phototoxicity evaluation in Caco-2 and N27 cell lines of symmetrical squarylium cyanine dyes</b>	Eurico Lima	<b>P122</b>
<b>Synthesis and biological properties of a symmetrical squarylium cyanine dye with a barbituric acid moiety</b>	Vanessa Gomes	<b>P123</b>
<b><math>\beta</math>-Functionalization of 2-nitro-tetraphenylporphyrin with acrylonitriles</b>	Maria G. P. M. S. Neves	<b>P124</b>
